🏠 Noisy-le-Sec — Greater Paris, France

🇫🇷 French

Technical Skills

Data & Machine Learning

Python, pandas, NumPy, scikit-learn, TensorFlow / Keras, JupyterLab, Conda, SQL

LLM & GenAI

Model Context Protocol (MCP), coding-agent integration, LLM APIs, prompt engineering, model evaluation

Cloud, Data & Infrastructure

AWS, Docker, Elasticsearch, Redis, Varnish, GitLab CI/CD, Ansible, Linux

Software Engineering

PHP / Symfony, TypeScript / JavaScript, microservices architecture, REST APIs, Git, automated testing

Soft Skills

Learning agility

Self-driven move into AI, alongside a double MSc.

Critical thinking & due diligence

I look for what can break before committing.

Strategic thinking

I think several moves ahead: production, timeline, cost.

Languages

English

TOEIC 970/990 — fluent (C1/C2)

Arabic

Hamdi LAADHARI

Data / AI Engineer

16 years in software engineering, 12 of them running high-traffic production sites (Voici, Gala): distributed architecture, Elasticsearch, caching, observability, cost. Now in a double MSc in AI (EPITA / EM Normandie), I bring that foundation to data and AI systems: what breaks in an LLM product is rarely the model, it's retrieval quality, latency and cost. Author of mcp-profiler-bundle, an open-source MCP server (5.7k installs). Seeking a 6-month final internship in Data / AI Engineering.

Education

MSc Artificial Intelligence (AIMS)

EPITA, Paris From Mar. 2026 to Aug. 2027

MSc AI for Marketing Strategy

EM Normandie, Paris From Mar. 2026 to Aug. 2027

MEng, General Engineering (Grande École)

ESIGELEC, Rouen From 2006 to 2009

Work experience

Tech Lead / Lead Developer

Prisma Média, Gennevilliers From Jun. 2013 to Oct. 2025

- Technical referent for high-traffic media sites (Voici, Gala, Femme Actuelle): availability, latency, infrastructure cost
- Full rebuild of [Gala.fr](https://gala.fr) and Voici.fr: Symfony, Elasticsearch (search and relevance), Varnish caching
- Migrated on-premise infrastructure to AWS and moved to a microservices architecture
- Industrialised environments and the CI/CD pipeline (Docker, GitLab CI, Ansible) across three teams
- Technical lead of a team of 3 developers

Software Engineer

Smile, Paris From Feb. 2009 to May 2013

- IT consultancy: fixed-price and on-site projects for large accounts (JCDecaux, Groupama AM, Yves Rocher, AFNOR, Icade, L'Équipe)
- Built and migrated technical platforms, integrated Open Source solutions (Symfony, Drupal, eZ Publish)
- Requirements gathering and direct technical contact on the client side

Projects & Open Source

mcp-profiler-bundle — open-source MCP server · Personal project — [github.com/killerwolf](https://github.com/killerwolf/mcp-profiler-bundle) (2025)

MCP (Model Context Protocol) server exposing an application's profiling data to AI coding agents. 5.7k Packagist installs, 11 GitHub stars.

Interests

Sport

Regular running, bouldering and strength training.

Photography & video

Freelance corporate and wedding video. Street and travel photography.
